Revenue 2024
3.58bn

- **High-Margin EV Inventory Shortages:** Flagship electric models (**7 Series**, **i7**, **i4**, **iX**) account for **68.1%** of all "Low Stock" alerts across the dealership network (32 out of 47 total low-stock flags).
- **Capital Locked in Order Pipeline:** **\$736.7M** in revenue (11.9% of total sales across 399 transactions) remains trapped in **In Transit** (\$515.4M) or **Pending** (\$221.3M) status due to fulfillment bottlenecks.
- **Discount Creep on Luxury Flagships:** Premium sedans require the highest promotional price concessions (**7 Series ICE** at **4.31%**, **i7 BEV** at **4.18%**, and **3 Series PHEV** at **4.16%**) compared to the overall network average discount of **3.99%**.
- **Dominance of Legacy ICE Revenue:** Internal combustion engine models continue to drive core sales, generating **\$2.92B (47.2%)** of total revenue across 45,877 units, anchored by the top-selling **BMW X5 ICE (\$1.17B)**.
- **Geographic Sales Disparity:** Sales volume is heavily concentrated in top international hubs like **São Paulo Jardins (\$581.4M)** and **Seoul Gangnam (\$339.9M)**, while major US metro centers (**New York at \$100.6M**, **Miami at \$103.5M**, **Dallas at \$113.5M**) severely underperform.
- **Severe Order Backlogs at Top Hubs:** High-volume dealerships suffer from severe pending order backlogs relative to available physical inventory, led by **Frankfurt Hub (70.0% backlog-to-stock ratio)**, **São Paulo Jardins (64.1%)**, and **Toronto Downtown (62.7%)**.
- **YoY Margin Erosion:** Average promotional discounts increased from **3.90% in 2023** to **4.06% in 2024**, indicating that 2024 unit growth (+39%) was partially pushed through price discounting.
- **EV Lineup Performance Split:** Mid-segment electric models (**BMW i4 Series**) drive high sales volume (**\$790.8M** across 13,423 units), whereas flagship ultra-luxury EVs (**i7 at \$494.4M** and **iX at \$427.3M**) exhibit slower unit turnover despite higher battery production costs.
- **Category Revenue Disparity:** Standard **Sedans (\$1.88B)** and **SUVs (\$1.72B)** constitute **58.3%** of total revenue, while **Electric SUVs (\$427.3M)** represent the lowest-performing body category.
